

Letter to Alexander V. Frolov from Dr. Hideo Hayasaka 1996

from Dr. H. Hayasaka

Letter of Introduction about
Mr. K. Sasaki, Mr. M. Muraki
and Mrs. K. Muraki

for Dr. Alexander V. Frolov

Dr. Alexander V. Frolov
Member of Academy of Megascience,
Institute for Free Energy

14 June, 1996

Dear Dr. Frolov :

I would like to introduce
Mr. Kenji Sasaki, Mr. Michiyoshi
Muraki, and Mrs. Katsuko Muraki
of my friends,

They are the owners of their companies
in Japan, and are very interesting in free energy
and ecology. As they want eagerly to attend
at your conference in order to see new
apparatuses of free energy, and to hear
the reports in new science, I would introduce
them to you. They are very glad of their
attendances at your conference.

Here, it should be mentioned from
me that Mr. Sasaki and Mr. Muraki

have brought the two sets of 19 volumes
per set, which are the Proceedings of the
Conferences in 1995-1995, in order to know
the new scientific researches in your
country.

I would expect that they are pleased
with your kind treatment for them, I
regret my absence from your conference
because my health is no good, as informed
to you.

Please, give my best regards to your
colleagues.

Sincerely yours,

Dr. Hideo Hayasaka

早稲田大学 

Professor of Tohoku
University
Sendai, Japan

P. S.

I greatly appreciate your kind many responses through e-mail of Dr. Toshiyuki Hashida of Tohoku University.

I have seen the abstracts of the Russian researchers' reports. I frankly recognize that the studies of your country in the fields of gravitation and free energy are splendid, and completely overcome those of America. On the other hand, my country's researches are poor, so I am planning the Foundation of Research and Development for the Ether Energy. I think that electric power can be generated from the vacuum energy (= the ether energy), hence I and my colleagues are beginning the research. We have three models for the power transformation from the ether energy.

I look forward to communicate with you.
Thank you.
